LIGHTWEIGHT

Consists of locally sourced lightweight volcanic aggregates, root zone sand and organic compost specifically formulated for green roof and rooftop plantings in the intermountain region.

LONG LASTING RESULTS

Designed to provide durability and long-term support to green roof and rooftop plants enabling them to establish and develop without compromising the structure below.

HISTORY OF SUCCESS

Our lightweight planting soils have been a successful part of rooftop and green roof plantings on hundreds of projects throughout the intermountain region and throughout the western US.
